EDUCATION

California State University, Long Beach

B.S • Computer Science

Aug 2020 - Dec 2024

EXPERIENCE

STEM Instructor

CodeREV Kids, Manhattan Beach, CA

Apr 2025 - Present

- Taught groups of elementary students foundational electronics concepts using Snap Circuits, delivering hands-on STEM lessons aligned with structured curricula.
- Managed classroom engagement and guided students through building functional circuits, fostering problem-solving, safety awareness, and curiosity in technology.

Camp Counselor

Girls Make Games, 2024 Summer Fellowship, Remote

Jun 2024 - Jul 2024

- Mentored students in 2D game development using Construct 3, guiding teams through the full development lifecycle, including design, prototyping, and milestone delivery.
- Provided individualized instruction on Construct 3 fundamentals, ensuring student mastery of game logic, level design, and mechanics.
- Supported collaborative teamwork and problem-solving in a remote learning environment.

Graphic Designer & Programming Officer

Video Game Development Association (VGDA), California State University, Long Beach

Sep 2023 - Dec 2024

- Facilitated technical workshops on Unity and Godot game engines, improving members' skills in scripting, animation, and game systems.
- Designed digital and print media assets, resulting in a 60% boost in event attendance and social engagement.
- Collaborated with a cross-functional executive board to align events with organizational goals.

Graphic Design Lead (Co-Designer)

Women in Computing (WIC), California State University, Long Beach

Aug 2023 - Dec 2024

- Designed detail-oriented promotional materials to support club events, outreach, and branding initiatives.
- Served as Co-Lead of the MarinaHacks Design Committee for WIC's annual hackathon, collaborating on branding, marketing assets, and visual identity for the event.
- Coordinated closely with team members to ensure cohesive and engaging visual content across digital platforms.

PROJECTS

HangoGo - Python, JavaScript, HTML, CSS, Google Places API

- Collaborated with a team of 4 to design and build a web app that uses AI to generate personalized hangout recommendations.

Invasion of the Alilackies! - Unity, C#

- Programmed enemy behaviors for a Doom-style shooter game as part of a team of 8, contributing to combat design and gameplay functionality.
